

IA, IOT, & VR

Tech Trends You Need To Know

Internet of Thing (IOT)

- Don't be fooled by the term "IOT" its just is basically a network of connected objects that collect and exchange data
- The whole aspect of IOT is to collect, analyzing and measure behavioral data that will help you market your goods and services to a particular set of people who will likely buy your services or products unlike everyone else

IOT cont...d

- Home and Work Security Systems
- Health & Medical Wearable's
- Wearable's & smart watches,
- Home appliances
- Greenhouse and home climate controls
- Fleet tracking & Monitoring
- SMARTPHONES

Artificial Intelligence (AI)

Basically a system or machine that mimics cognitive functions of human mind such as learning and solving problems

Examples self driving cars, robotics, search engines, email filtering apps, playing chess with a computer, online customer support, personal assistants like Siri, Bixby & Amazon Alexa

Worldwide Amazon, Facebook, IBM, Google and Microsoft are leading this field of AI.

Chatbots

- Chatbots are a huge part of IA & are already being used for customer services, news filtration, providing updates and latest information via push notifications
- Fast food restaurants (KFC, McDonalds), News, Streaming Video Content (Netflix, Amazon Prime), Air Traffic updates and Weather
- Facebook has integrated them hugely in Messenger. (payment of goods online, order food, get new updates)

Virtual Reality

- The term says it all its Virtual and its really close to Reality
- Avatar Upgraded, VR is upgraded 3D with all 5 senses being activated.
- Films (Video), Web Surfing, Games, Architecture, Arts

Virtual Reality cont....d

- Samsung, Google Carboard, Amazon & HTC have been in front of VR movement
- Hardware for VR Set, recording and shooting is still expensive in this modern day and age and also the VR Videos are still growing
